SUMMARY

7 years of programming experience in c++ and Java in both research and industry.
5 years of computational physics research focusing on Quantum Monte Carlo simulation.
4 years of experience of production data analysis using python with scipy, pandas library.
Strong math and algorithm background in linear algebra, statistics, numerical optimization, machine learning.

SKILLS

Programming: C++, Java, Python scripting(Numpy), Matlab, Linux(Bash Script, Vim)
Coursework and Certificate: Coursera Certificate in Machine Learning(Regression, Decision Tree, Clustering), Coursera Certificate in Deep Learning(Neural Network, CNN, RNN), Algorithms and Data Structure.

EXPERIENCE

Application Engineer, Advantest America, Inc. July.2013-Now

Developed and delivered system on chip(SoC) test programs for Advantest 93K automated tester platform.

Achievement Highlights

- Developed test methods in C++/java for DC test, digital test, RF(Transmitter/Receiver) test.
- Developed universal test method library for On-Die Parametric test on different TI DSP device, provide device characterization results to R&D.
- Built data analysis tool using python(including scipy, pandas library) to do data analysis.

Research Assistant, Department of Physics, North Carolina State University, Jun.2009-Jun.2013
Conducted computational physics research focusing on electronic structure using quantum Monte Carlo method, developed and maintained computational software code in C++ for 3 years.

Achievement Highlights

- Applied mathematical model and evaluated the expectation values of physical quantities using Monte Carlo integrals for solid state and semiconductor systems.
- Carried out numerical wavefunction optimizations(steepest descent, quasi-Newton, etc.) to reduce the data fluctuation.
- Fit numerical model to the calculation data using cross-validation fitting and present the result to research funding agency.
- Developed, contributed quantum Monte Carlo software package by designing every class and method independently using C++(10k lines) to calculate spin-orbit interaction.

EDUCATION

- **Ph.D Physics**
North Carolina State University, Raleigh, NC, USA, Dec.2013 GPA:3.63/4.0
- **B.S. Physics, Minor in Economics**
Shanghai Jiaotong University, Shanghai, China, Jun.2007
